4A Labs

TECHNOLOGY AND INNOVATION BRILLIANTLY BLENDED

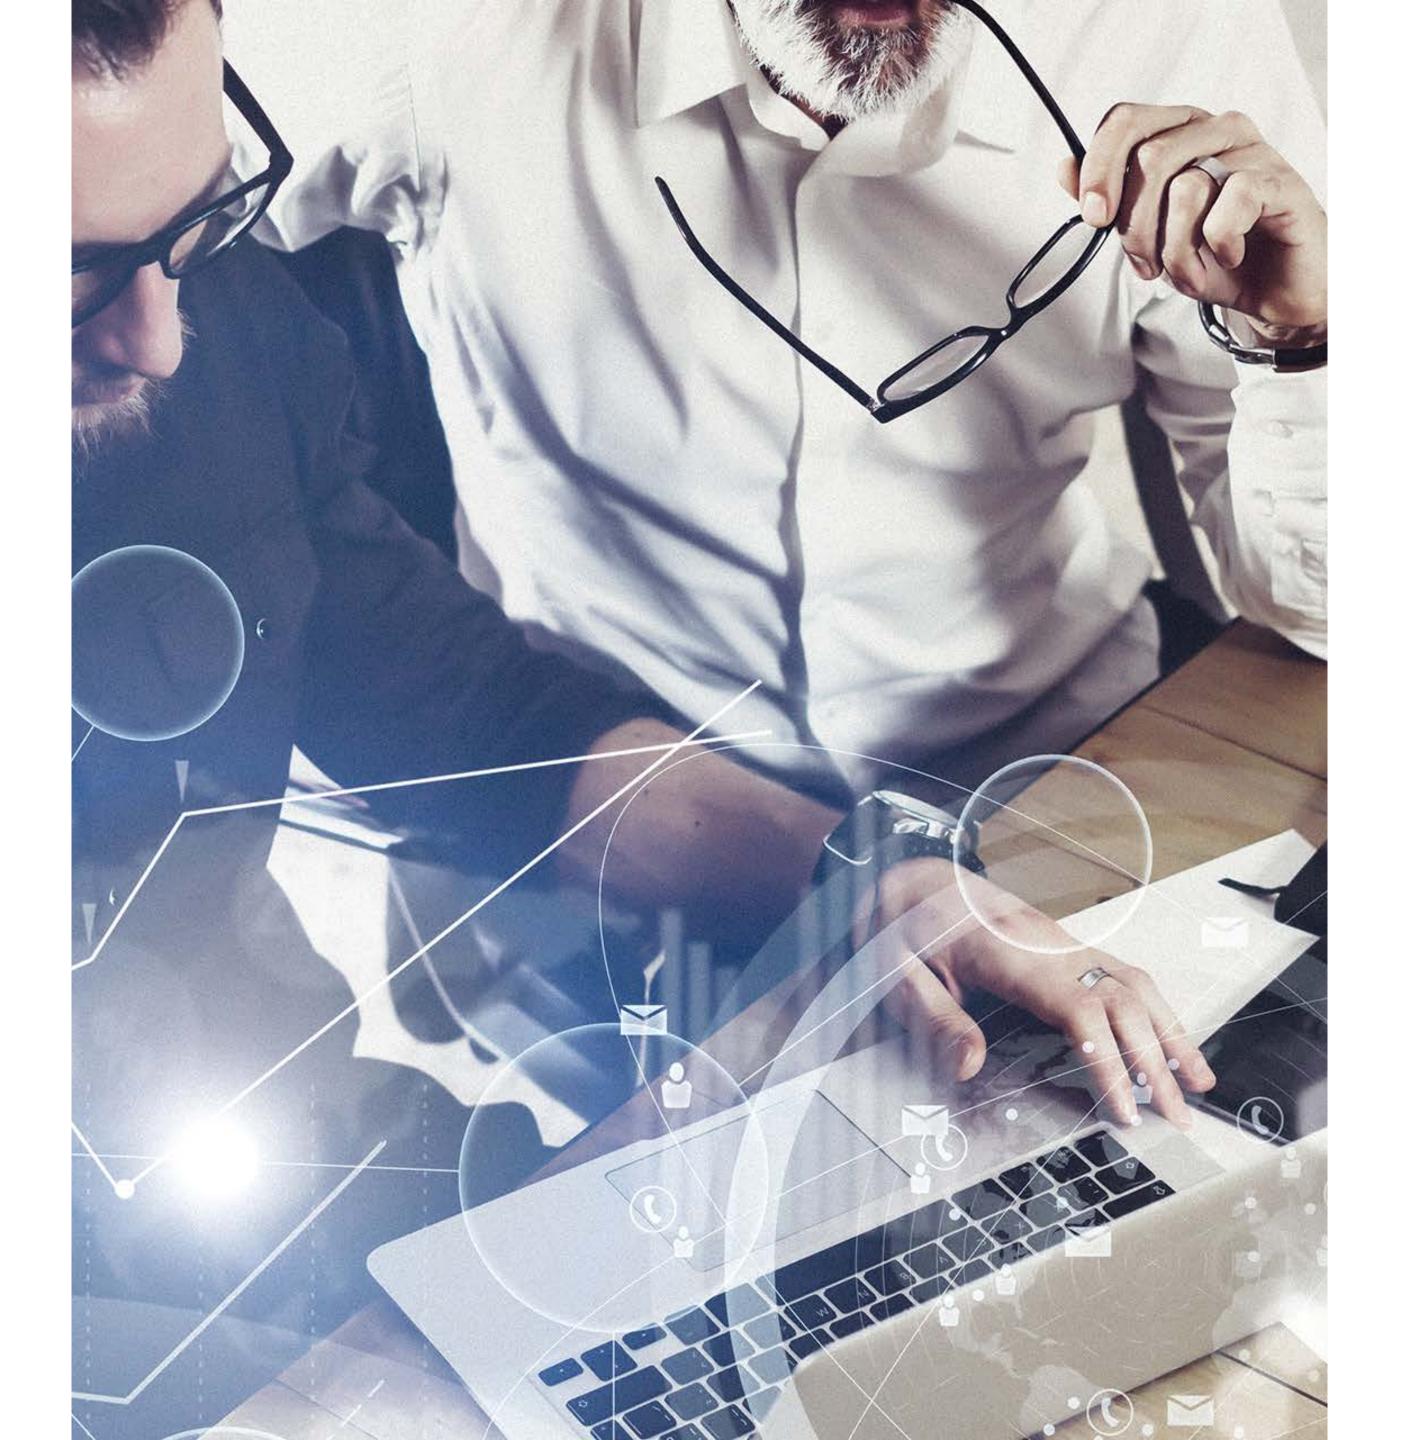

ASPIRE - ADAPT - ADVANCE - ACHIEVE

We turn your ideas & ventures into reality.

WHO WE ARE?

We are 4A Labs, your innovative technology solutions partner. We are a team of highly experienced managers, technical architects, engineers, developers, analysts, data scientists and designers who work around the clock to deliver software and hardware solutions that will reduce your costs, increase your visibility and save time during your decision making process. We know one size doesn't fit all, thus, we tailor knowledge, experience and technology just for your needs

OUR EXPERIENCE

OVER 50 YEARS

Our managing partners have over 45 years of combined Experience & Expertise in Enterprise Level Software & Platform Development, Mobile Application Design & Development, e-Commerce, BI, Big Data Analysis, B2C/B2B, CMS, CRM, ERP, AI and IoT Solutions. All our projects follow Agile & Scrum Software Development & Project Management,

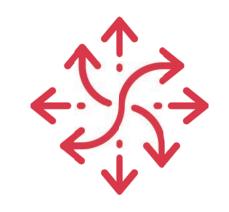

OUR COMPANY IN NUMBERS

Our Capabilities

Our value and promise to our clients & partners is to be their long term "in-house" IT, Digital and Creative Service Partner for their ventures and enterprises by offering in-budget, on-time, and agile IT solutions.

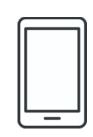

Internet of Things (IoT) Programming
Artificial Intelligence (AI) Programming
Hardware Embedded Programming
Wearable Programming
User Experience (UX)
User Interface (UI)
3D Modeling & Programming
Search Engine Optimization (SEO)

Web and Mobile Design & Development
CRM, ERP & e-Commerce Platform Dev.
Backend Integration & Development
Service Oriented Architecture (SOA) Web
Services Dev. & Integration
Database Design & Development
System & Business Analysis
Enterprise Level Architecture

Our Technology Expertise

Our strength and proficiency in the following areas of technology enable our clients & partners to grow their businesses much faster, steadier and scalable

Mobile Development

iOS (Objective-C, Swift)

Android (Java)

React Native

Flutter

Xamarin

Ionic

Front-End Development

CSS/HTML5

Javascript, Ajax/jQuery, Dojo JS, ReactJS, AngularJS, jQuery Mobile

Responsive Design (e.g. Bootstrap)

JSON/XML/REST & RESTFULL

APIs/Web Services

Web Development

Go Lang

Node.JS

.NET - C#/ASP.NET

PHP

Ruby on Rails

Java

Python

Database Architecture

Oracle

MS SQL Server

MySQL

PostgreSQL

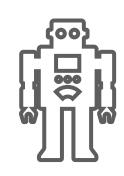

NoSQLs

(CouchDB, MongoDB)

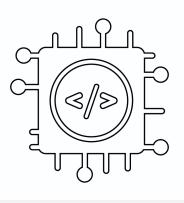

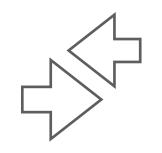

Our Technology Expertise

Our strength and proficiency in the following areas of technology enable our clients & partners to grow their businesses much faster, steadier and scalable

AI, Machine Learning & Neural Net

Neural Networks

Computer Vision

YOLO

Tensor Flow

DarkNet

Object Classification

Internet of Things (IOT)

Indoor Positioning

Outdoor Positioning

Custom Hardware Design

WiFi / GPS / RF Applications

Wearable Programming

Embedded System Design & Development

Custom PCB design

IC architectures: ST, ARM, ATMEL, FPGA / Zylinx, ASIC

Video/Image Processing Algorithms

Sensor and I/O Integration

Advanced Communication Protocols

Integration Solutions

ERP (SAP, IFS, JD Edwards, etc)

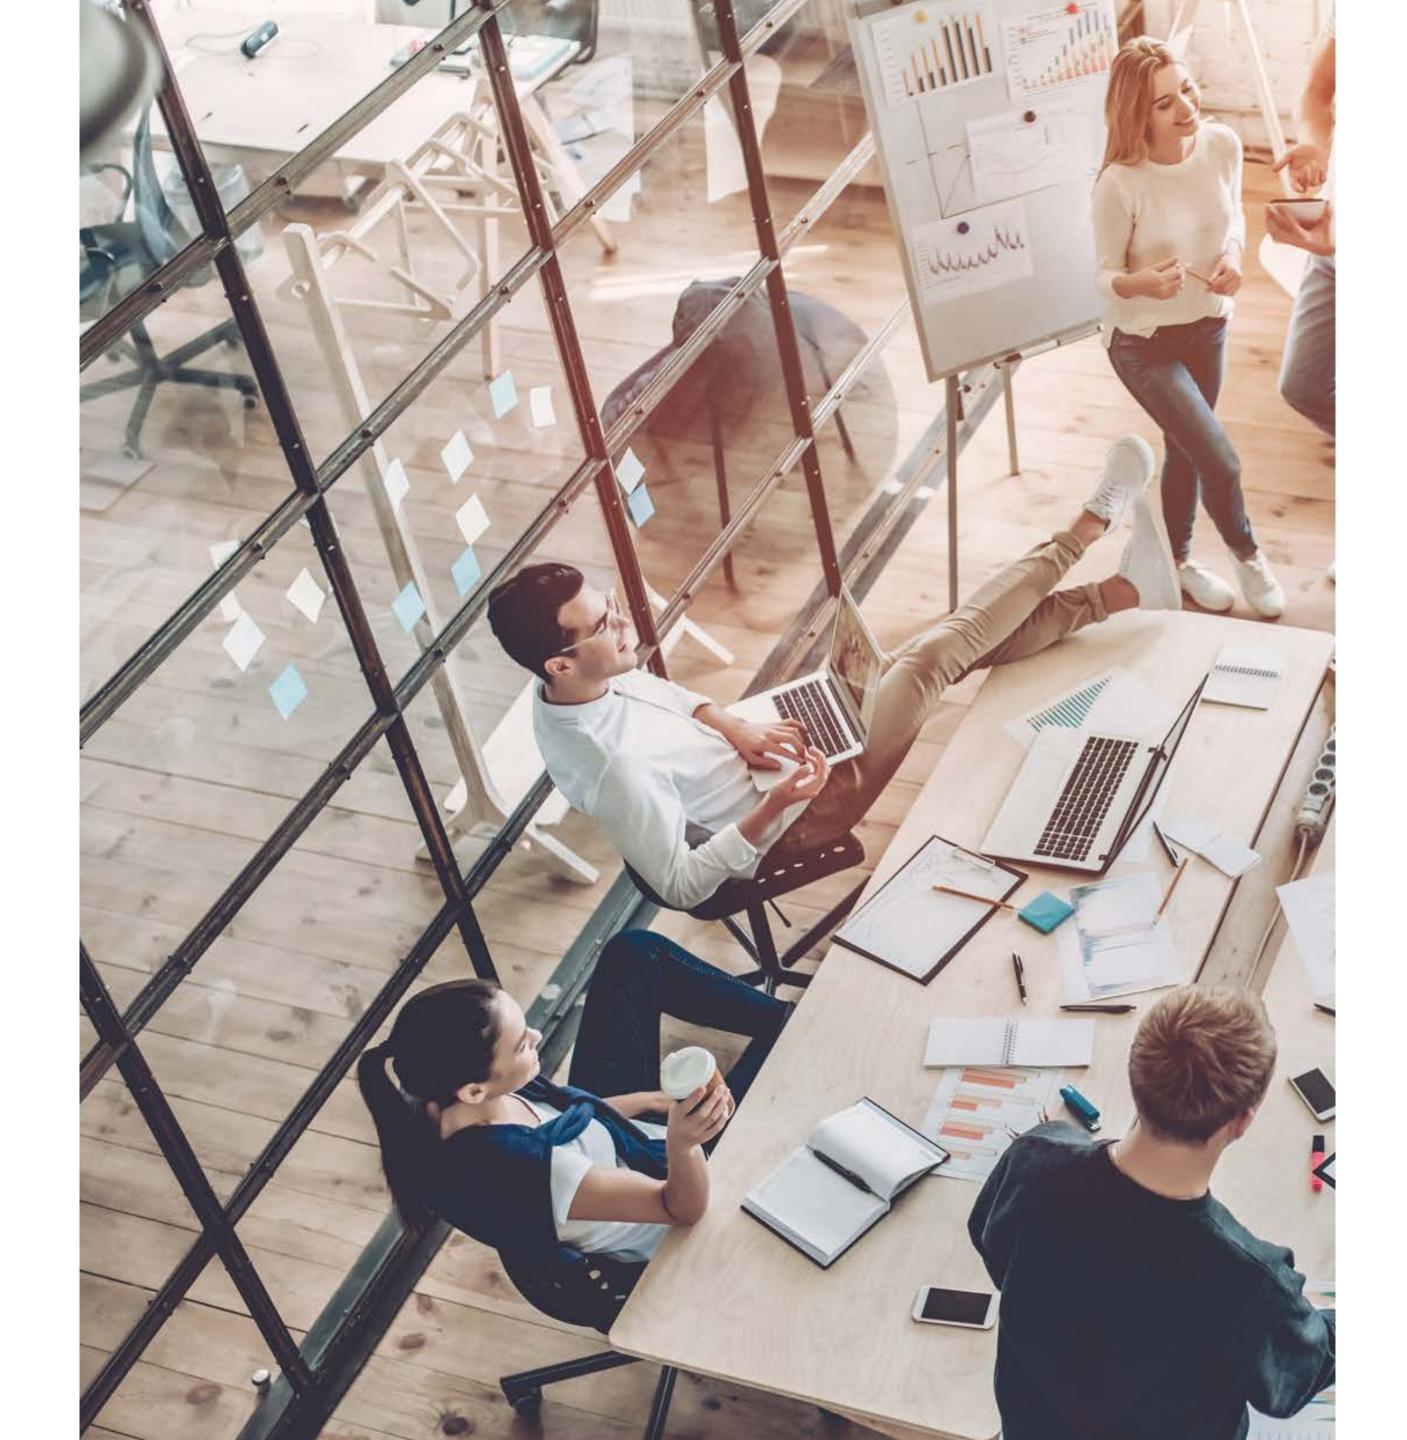

Legacy Systems

AS/400

Scada - PLC

3rd Party Systems

Our Sectors

As a full-service technology and creative solutions provider, we service multiple sectors and industries while working with some of the leading enterprises in their fields.

Our Custom Solutions

As a full-service technology and creative solutions provider, we rigorously manage operations, focus on quality and operational excellence, while offering competitive pricing. We build lasting partnerships based on trust and transparency. We tackle business problems with intelligence. We use cutting-edge technology and creativity to achieve unparalleled results.

Customer Relationship Management(CRM)

B2C / B2B E-Commerce

Distributor Management

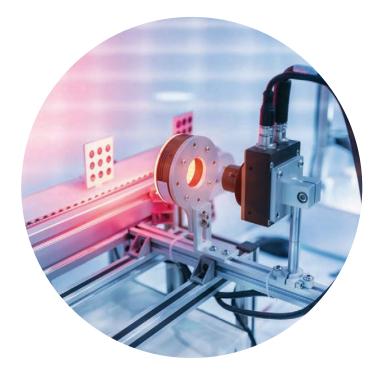

Health&Safety Systems

Cyber Security

Procurement Management

Computer Vision

Planning & Forecasting Systems

Core Banking & Payment Systems

Contact Tracing & Reporting System

What is It?

It enables people to protect their social distances in the workplace with the notification mechanism.

It measures interactions and provides historical reporting.

Increases Awareness on Social Distancing.

Adapts to all conditions with its quick and easy set up and monitoring solutions.

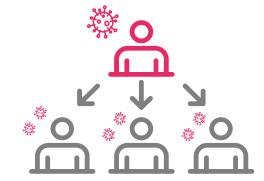

With the low energy WIFI & RF technology, it can monitor contact without location tracking.

Wearable hardware can be used by attaching it to the belt or safety vest.

Reports workers in close proximity when an infection occurs and automatically identifies risk groups.

With anonymous user profiles, it enables risk management without tracking.

How Does It Work?

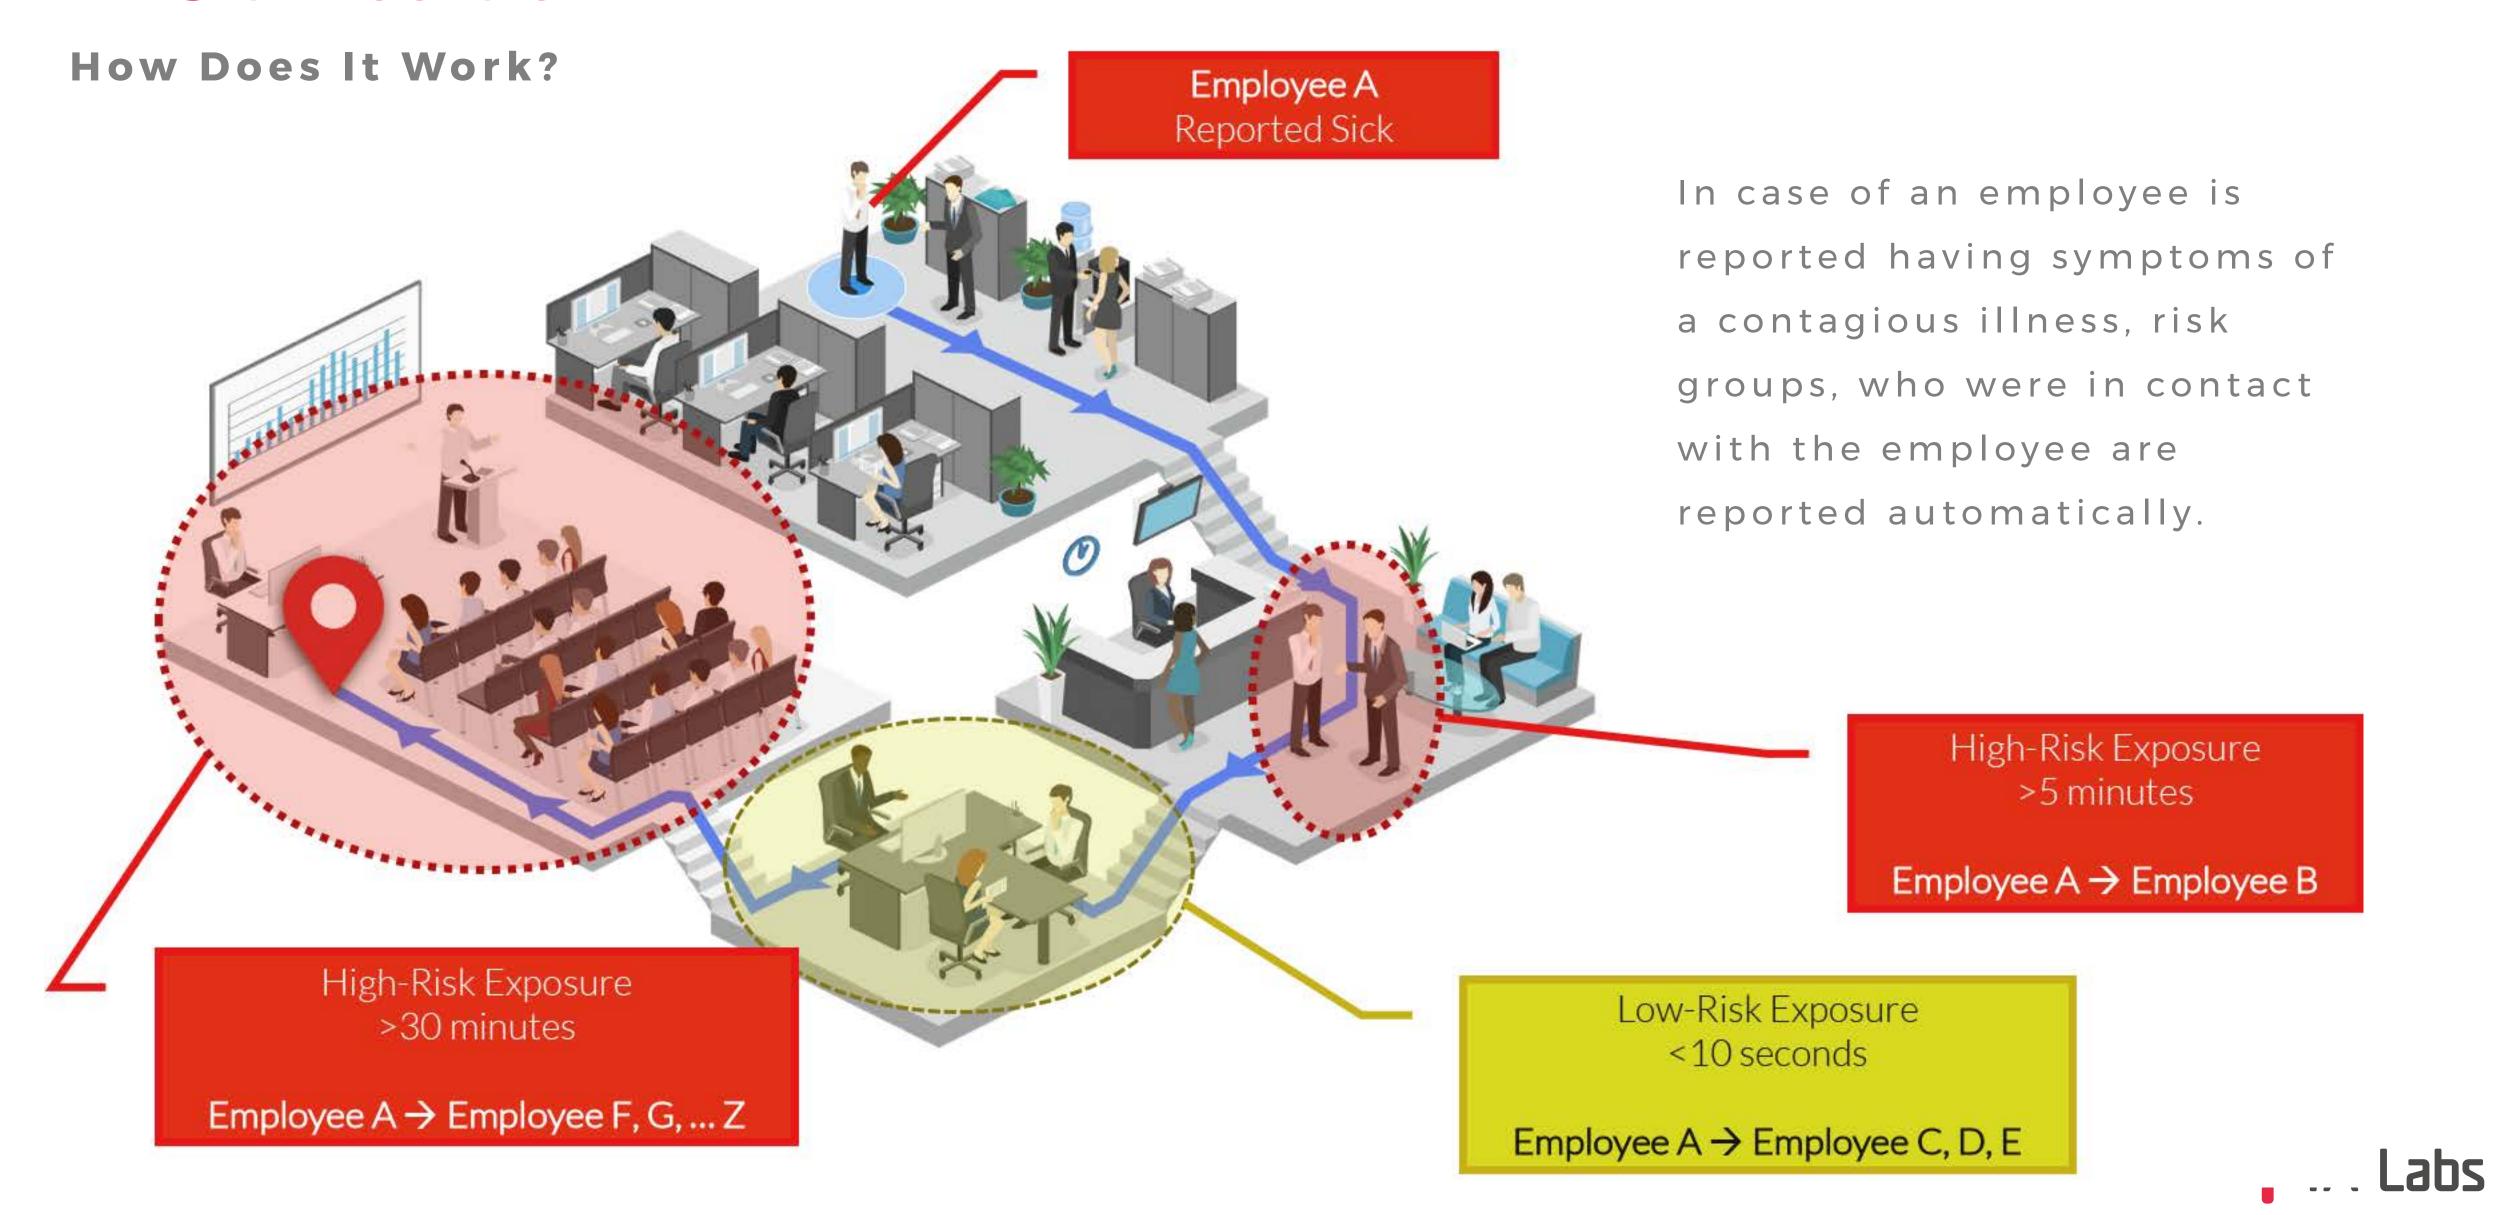

Tracks the proximation of your employees with each other using a light-weight RF device.

Calculates the distance of proximation and time of exposure.

Can precisely monitor proximation in a group of people.

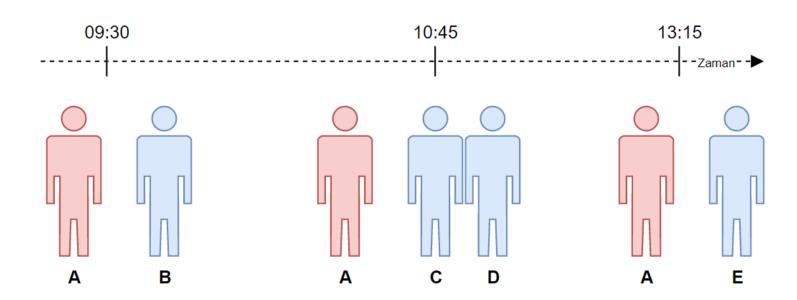

Risk Group Identification

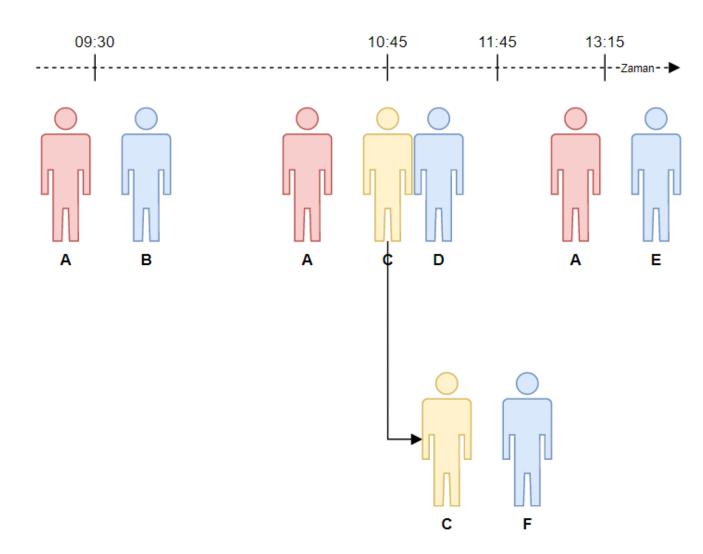

Linear Identification

Employee A is directly in contact with Employees B,C, D and E.

B, C, D and E are in Risk Group

Nested Identification

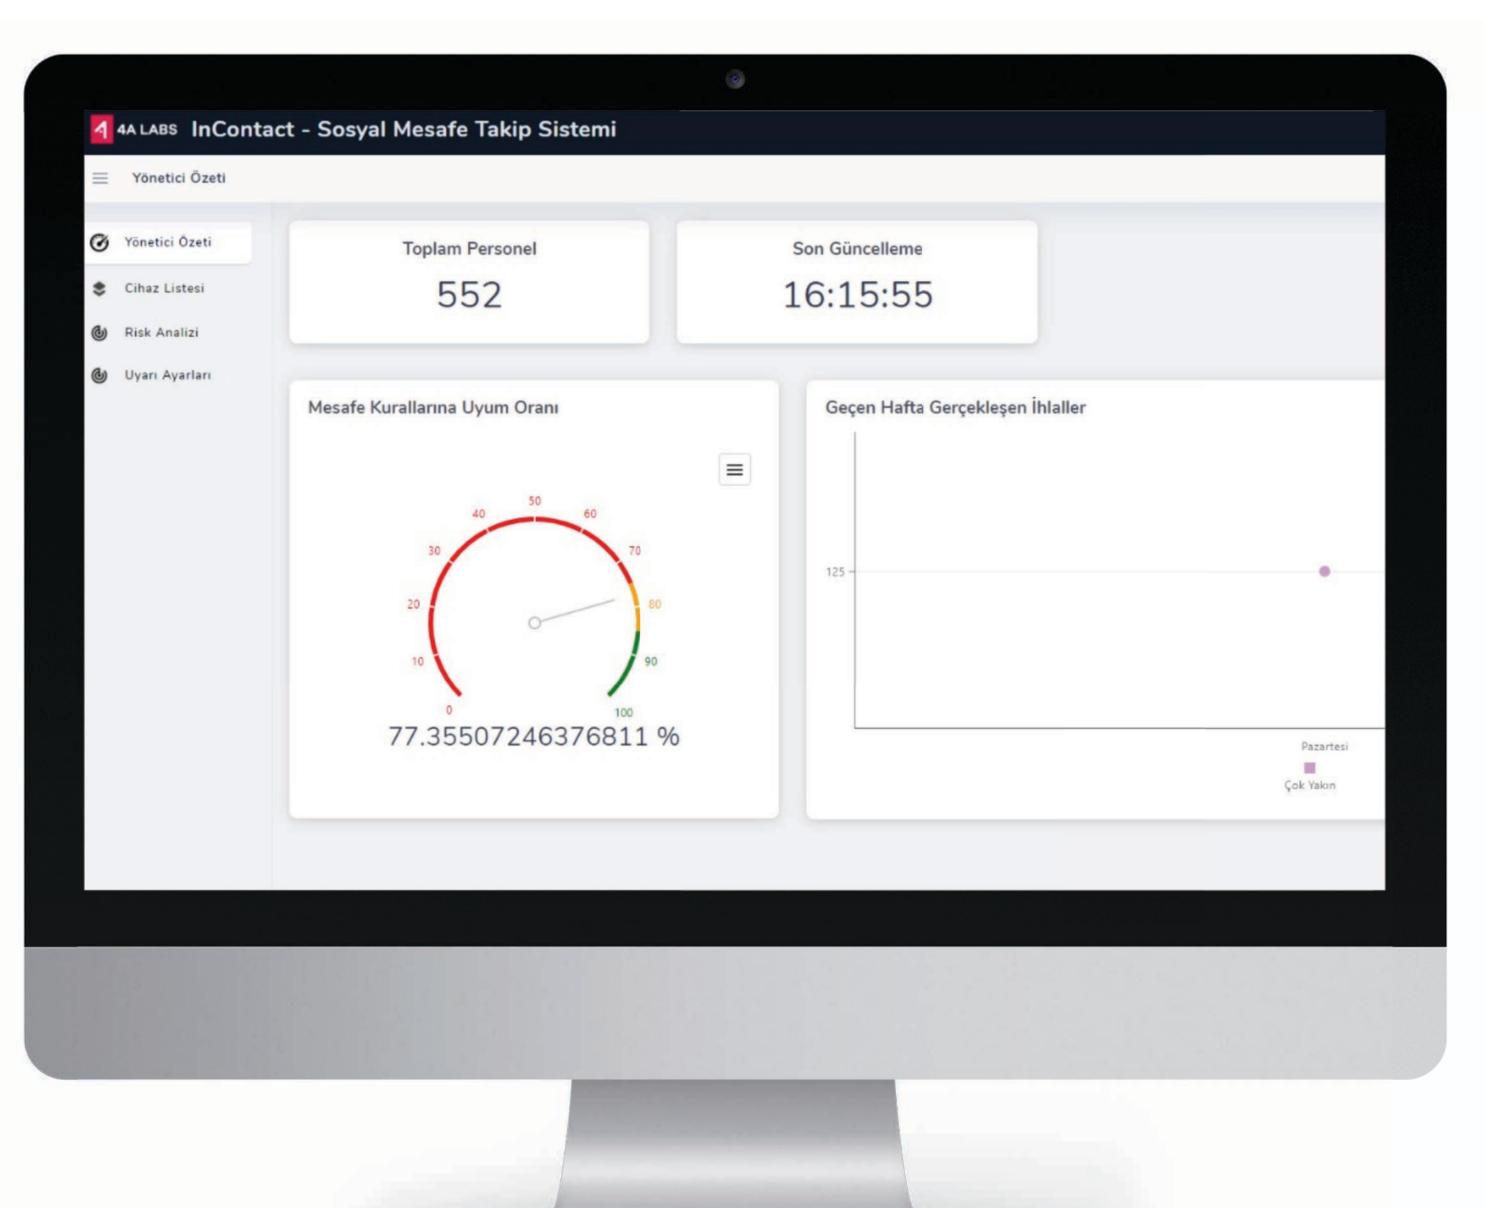

Employee A is directly in contact with Employees B, C, D and E.
Employee C was in contact with Employee F.

B, C, D, E and F are in Risk Group

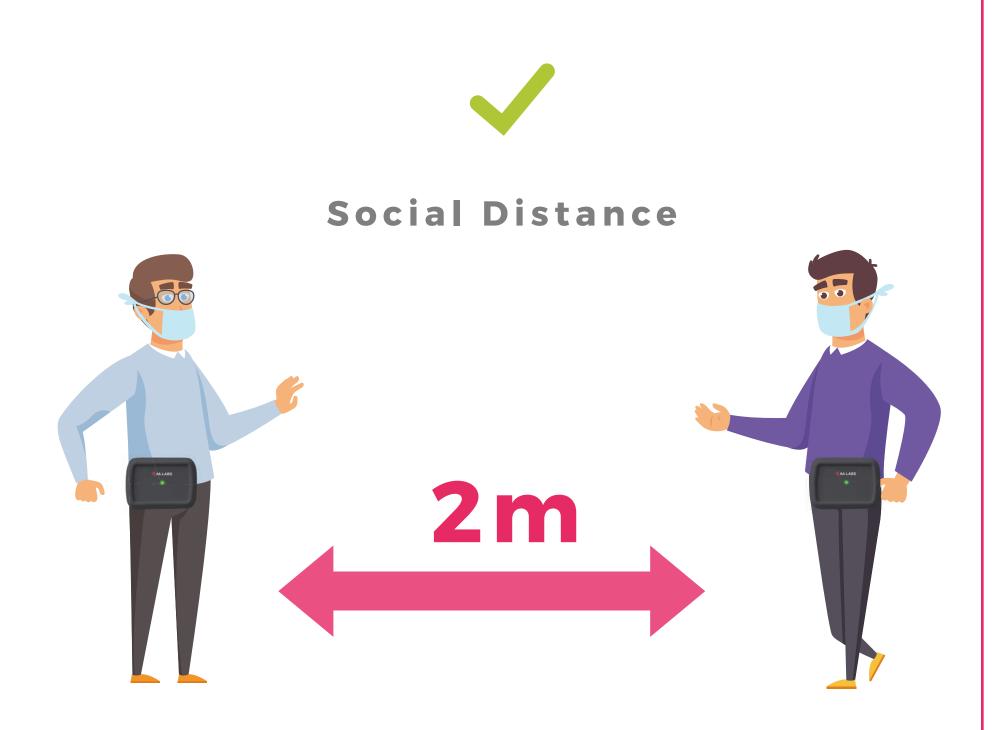

Control Panel

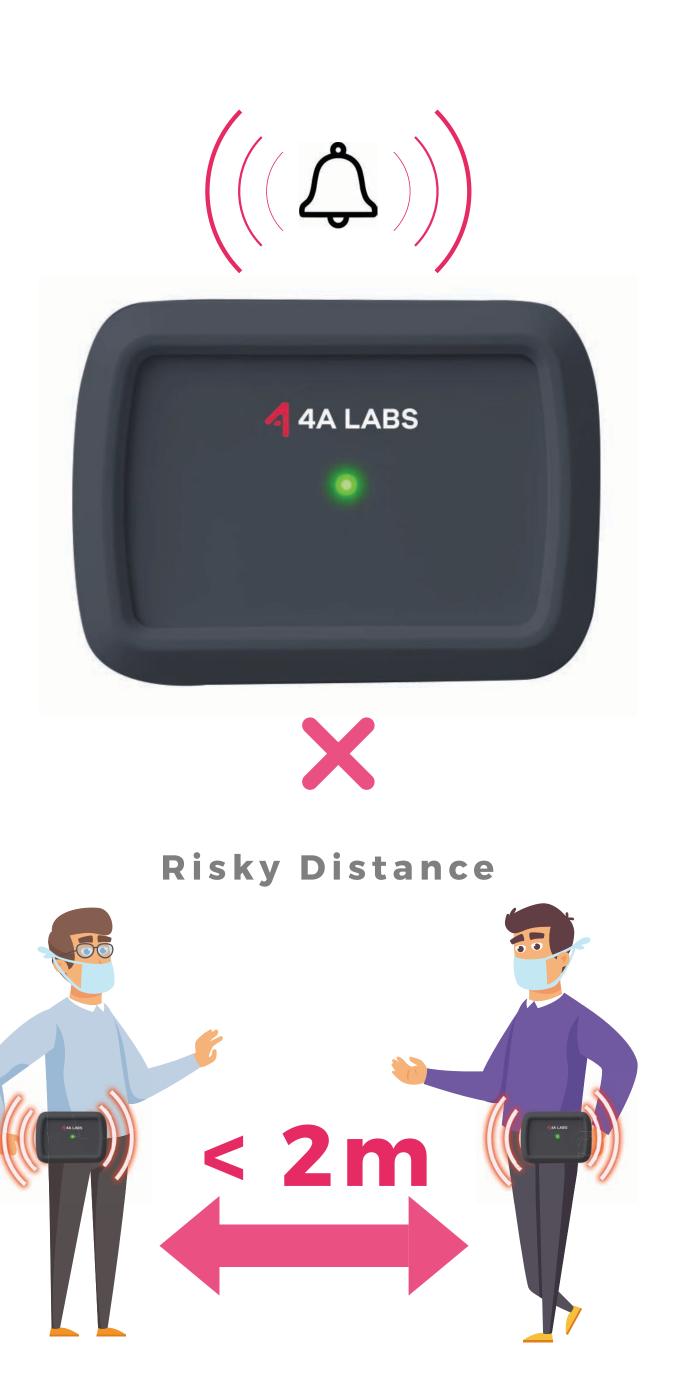

inContact Control Panel screen provides the opportunity to evaluate against the risks of infectious disease and ensures that necessary measures are taken.

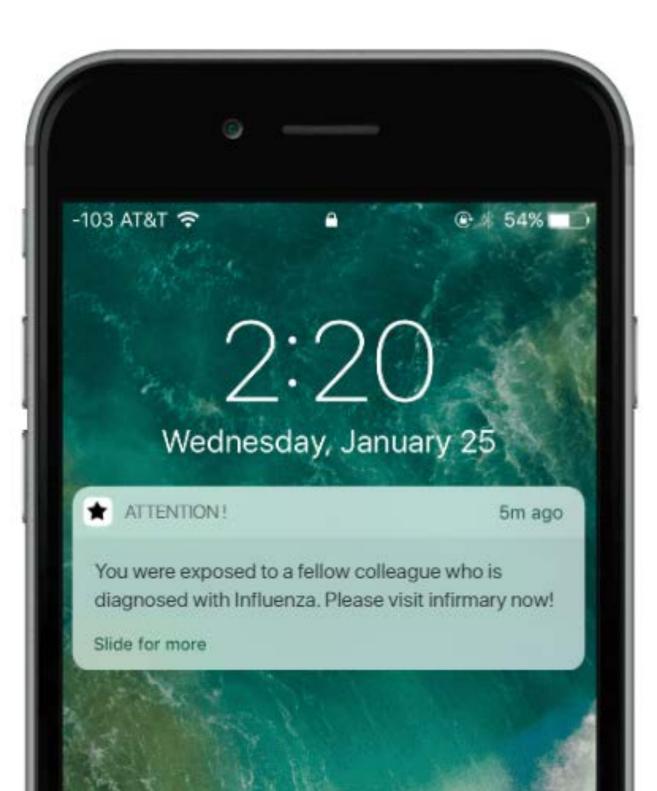

Automated Notifications

inContact automatically
notifies employees who are
in a risk group via

- Push Notifications
- · SMS

Shopping Cart and Basket Social Distance Checker

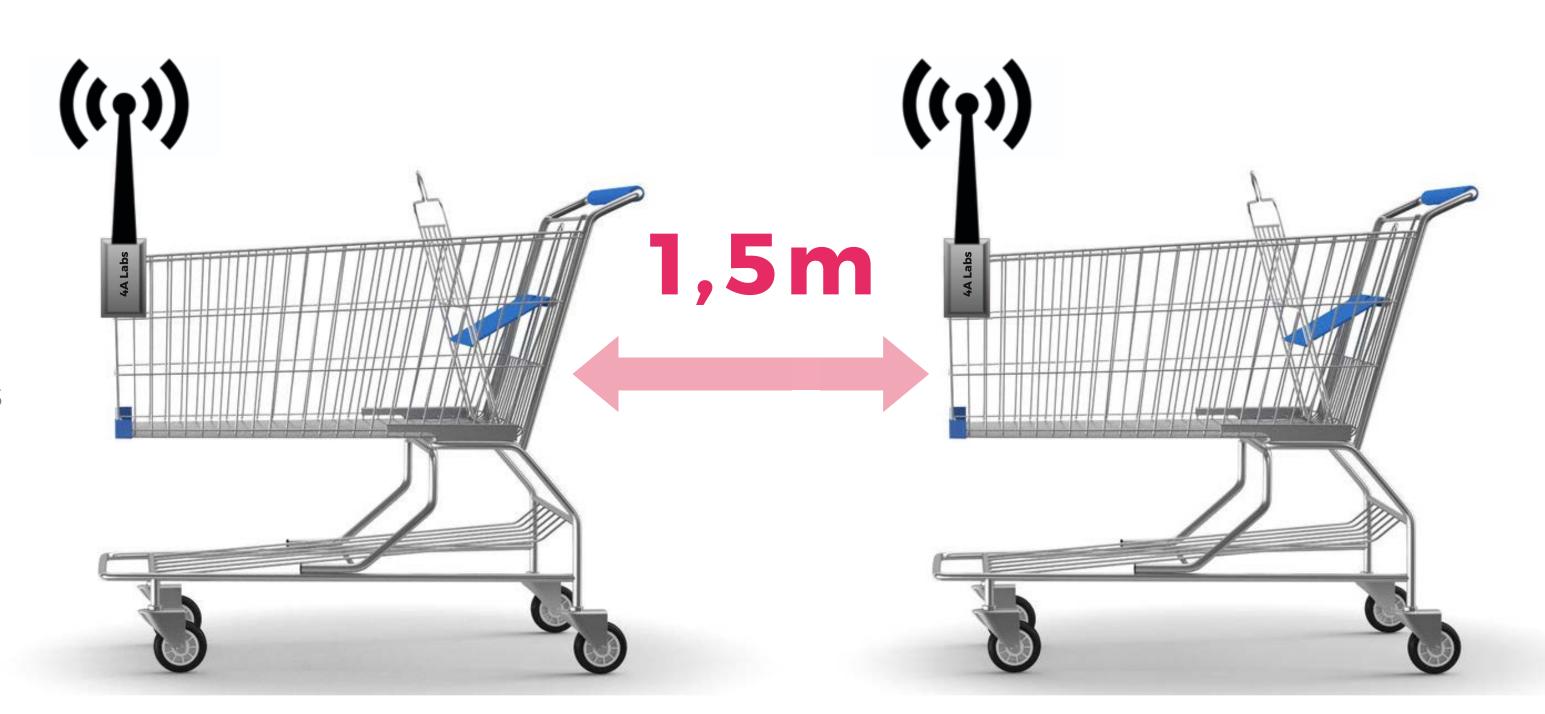

Alert shopping carts and baskets in close proximity. inContact-CART is the ultimate passive alert system to ensure a safe distance of your customers at your shop floors

Distance Checker

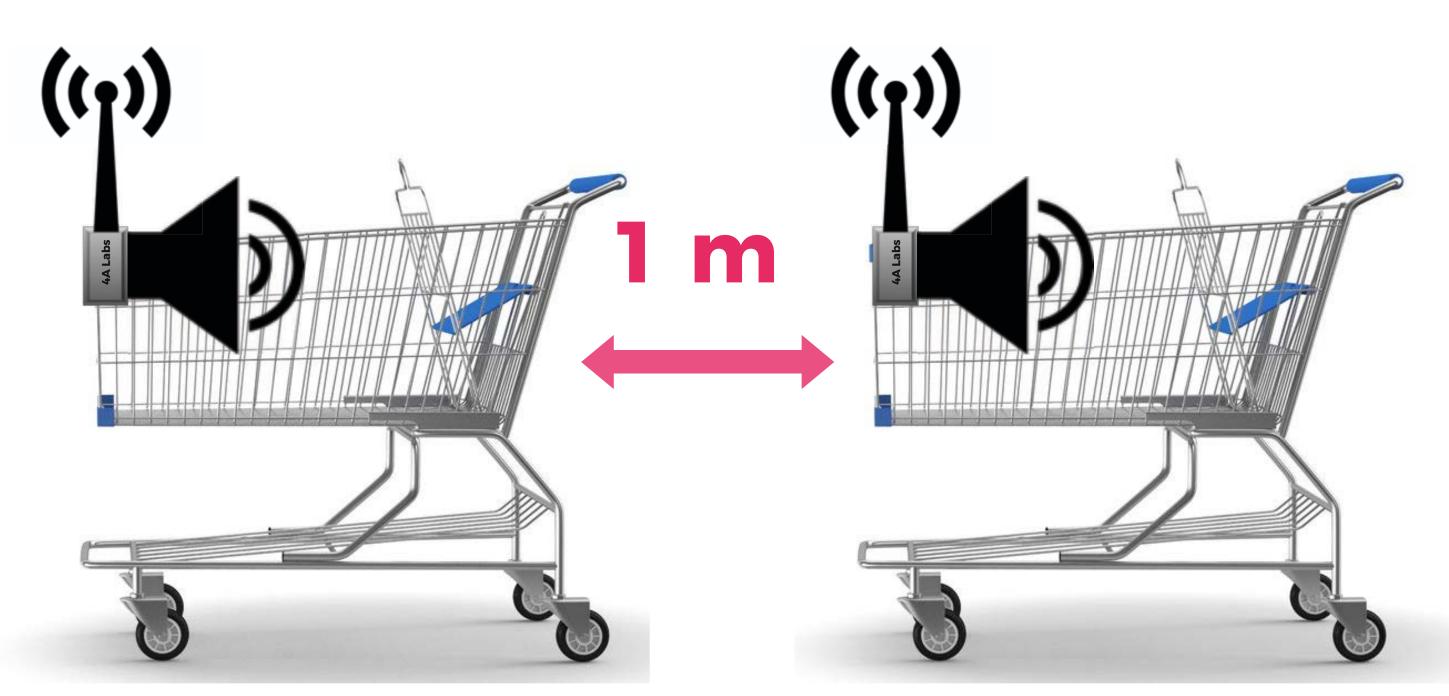

Using Radio Frequency technology,
inContact-CART measures the accurate
proximation of each cart to other carts
in a predefined range

Audio Alerts

In case two carts are in close proximity to each other, an audio warning is triggered until the carts are moved to a safer distance

Multi Orientation and Variant Operation

RF hardware is able to accurately operate in multi-orientation operation with different variants of shopping carts and baskets

Features

RF hardware encloses high-tech features

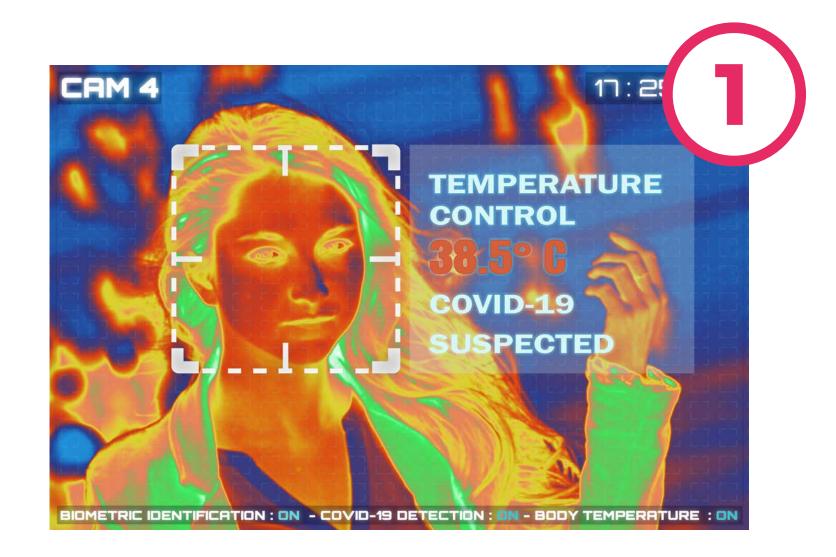

- Low power RF transceivers with no antenna design
- Battery operated with up to 15 days of constant use on a single charge
- USB 5V standard charging connector
- Software update through USB port
- Piezo or Passive Buzzer
- Red LED to display close proximity
- Auto shut-down in cart parking area

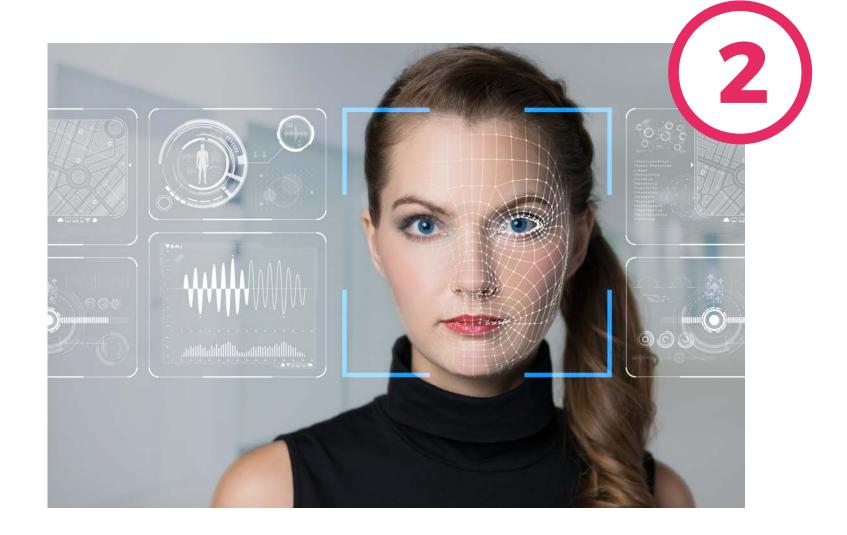

inContact - THERMAL

Continuous Fever Monitoring

Identifies high body
temperature from face using
inContact infrared module

Matches the face from employee records using advanced Al algorithms

- Notifies supervisors with potentially sick employees via;
 - Push Notifications
 - · SMS
 - E-Mail
